

RAILWAY ROLLING STOCK CABLE MATERIAL PROPERTIES

This material with characteristics of oil resistance, low temperature resistance, flame retardance, low toxicity etc. can meet the requirements of EN50264 EM104, EI109 & EN50306-1 S2. It is suitable for use in railway industry.

Features:

- Electron-beam cross-linked
- Low Smoke Zero Halogen
- IRM902 oil & IRM903 fuel oil resistant
- -40 ° C low temperature resistant
- Fire resistant
- 125°C thermal life reaches 20000h
- Excellent electrical performance
- High abrasion resistant
- Toxicity index \cong 3
- Compliant with RoHS & REACH environmental regulations
